

Jaimie Stevens currently works as an engineer with Applied Control Equipment. She began playing violin with the Arapahoe Philharmonic during the 2011-2012 season, which coincided with her freshman year at the Colorado School of Mines. She graduated from CSM in 2015, with a B.S. in Engineering Physics. After college, she continued to play with the Arapahoe Phil, joining the Orchestra Advisory Council as a violin representative, and her most recent involvement is as a member of the board. In her spare time, Jaimie enjoys all things “nerd” – reading, books, board games – you name it!
